GlobalLogic®
A Hitachi Group Company

DA - Policy - Quality

This Policy is available for all the organization and interested parties.

- Quality is not an option, but a necessity, which allows us to achieve our business objectives.
- The Quality Management System makes work more organized and productive through transparency of processes and effective issue resolution.
- The Quality Management System brings value to Partners, ensuring that GlobalLogic deliverables meet applicable requirements and Partners' expectations.
- The Quality Management System encourages early issue detection and, thus, preventing problems through effective implementation of risk management practices and numerous quality controls.
- The Quality Management System makes the performance of all functions within its scope measurable, transparent, and easier to manage, thus maintaining and improving its effectiveness.

Quality Policy - External Communication
Quality Policy at the Quality Manual.
