

Intelli-Insights Accelerator

AI-powered platform that enables enterprises to turn rich data into intelligent insights, predictions, and root cause analyses — all without requiring niche AI / ML skills

ML-as-a-Service to get data-driven insights faster

Intelli-Insights is GlobalLogic’s AI-powered platform that transforms rich data into actionable insights through Machine Learning. The platform enables businesses to quickly obtain data-driven insights without having to hire AI/ML specialists to build a custom data science solution. Intelli-Insights helps businesses interpret rich data to better understand their customers, make more informed decisions, explore new business opportunities, and build intelligent applications.

Deploy & Scale On-Demand

Intelli-Insights is a containerized, cloud-native platform that scales on-demand and can be deployed with just one click. It also offers hassle-free enterprise integration with built-in connectors.

Customize Your Solution

The platform is flexible and pluggable by using best-in-class, open source ML libraries and a loosely decoupled architecture. Users can also “bring their own data” and set up new ontologies through the UI.

Eliminate Dependencies

Bridge skill gaps within the enterprise without needing to find or hire AI/ML specialists. Eliminate dependencies on vendor-provided AI/ML capabilities to deliver data-driven insights.

Build Intelligent Applications

The platform enables businesses to rapidly build, host, and deploy intelligent apps anywhere that data exists. Use a pre-defined, standard AI app, or build your own custom app.

Run Powerful Analytics

Intelli-Insights delivers root cause analysis and ensures a high degree of interpretability to foresee issues with measurable reasoning.

Increase Productivity

By reusing ML models, the platform increases productivity and delivers data-driven insights faster. It can even support the execution of multiple ML libraries in parallel.
