# GlobalLogic®
A Hitachi Group Company

Your Partner in Pet Health Data Intelligence & Diagnostics

Data is the lifeblood of your enterprise. But the challenges of big data architecture including technology stacks, hosting capabilities, and data governance are increasingly complex.

Unlock Endless Opportunities & Digitally Transform Your Business with Fully Activated Data

With our vast expertise in crafting analytics platforms, GlobalLogic empowers organizations to unleash the true potential of their data sets. Leveraging these platforms empowers businesses to enhance therapy compliance, boost product adoption, and innovate new service offerings.

For more than 20 years, GlobalLogic has helped clients design, set up, and maintain complex distributed technology infrastructures that span cloud computing, mobile, big data, analytics, social computing, security, IoT, and more.

Our dedicated healthcare digital product development and engineering experts utilize cutting-edge data platform accelerators, enabling the rapid establishment of end-to-end flexible data platforms for our clients.

These seamlessly integrated modular components expedite raw data transformation into valuable and actionable insights so you can gather, process, and analyze data from every corner of your enterprise.

2,300+
Industry-Dedicated Engineers

**300+**
Compliant Healthcare Products

20+
Years of Industry Experience

We help our pet health partners:

- Innovate to **create new lines of revenue** with digital product engineering and new service offerings
- **Conquer data challenges** around rights and licensing, privacy, PHI, access control & more
- **Drive therapy compliance** and product adoption

What can GlobalLogic do for you?

GlobalLogic
A Hitachi Group Company

We help clients create
**world-class data intelligence
& diagnostics solutions**
by looking beyond how things
are to what they could be.

Solutions

We build scientific platforms
for the following applications:

- Data trending for population health
- Disease diagnostic applications
- Clinical trial data
- Enterprise data warehousing

These sophisticated software
development projects also
include AI/ML capabilities
using various UI/UX designs
that help visualize data.

Capabilities

- Artificial intelligence and machine learning solutions

- Cloud application development and implementation

- Full lifecycle data security services and operations

- Digital accelerators to deliver quality, compliant solutions in a fast and repeatable way

- Mobile-first experiences and next-generation interfaces

The GlobalLogic Difference

GlobalLogic takes pride in providing
solutions that improve both pet owner and
clinician outcomes. We help clients across
the spectrum of Pet Insurance, PetTech, Pet
Products/Sevices and Pet E-Commerce
to design and build innovative products,
platforms, and digital experiences.

Here are a few reasons why smart device,
pet technology, and diagnostics clients
choose GlobalLogic:

- Our **deep working knowledge** of ISO governing standards enables us to work with many different companies' QMS and SDLC.

- Our **experience** in using a variety of tools, software languages, cloud environments, and infrastructure to seamlessly integrate and collaborate with your in-house engineering team.

- Our **expertise** in the design, building, implementation, and testing of systems and Class I, II, and III products in accordance with ISO 13485 certified QMS/IEC 62304 compliant SDLC.
