

Your Partner in Pet Health Platform Design, Development & Implementation

Simplify and accelerate the design, configuration, and deployment of modernized platforms for connected petcare, insurance, pet e-commerce, and more.

Solve Business Challenges & Improve Clinician & Pet Owner Experiences with Platforms

The digital landscape is constantly evolving, and pet health companies must stay at the forefront with technology that enables cutting-edge services.

At GlobalLogic, we understand the complexities pet health companies face in integrating their digital platforms with various existing systems, such as veterinary clinics, pharmacies, and laboratories. We design and develop solutions to even the most persistent business challenges, with digital platforms built for security, interoperability, regulatory compliance, scalability, and exceptional user experience.

We've helped clients like Petplan, the most comprehensive pet health care insurance in North America, transition quickly and successfully to a microservices architecture-based platform as part of its digital transformation.

Fetch Pet Insurance also chose GlobalLogic to modernize its key offerings with our recommended migration to AWS cloud services.

The question is, **what can we do for you?**

2,300+

Industry-Dedicated
Engineers

300+

Compliant Healthcare
Products

20+

Years of Industry
Experience

We help our pet health partners:

- **Innovate with confidence**, backed by meaningful data and our Digital Advisory & Assessment outcomes
- **Reduce costs and go to market faster** with Digital Accelerators such as our Microservices Accelerator, a foundational platform with pluggable modules for the most common Non-Functional Requirements (NFRs) needed for any microservices-based deployment.
- **Augment in-house expertise** and fill the skills gap with industry-dedicated designers and engineers.

Leverage GlobalLogic's
deep digital product engineering
expertise and pet health experience
to transform and modernize your
pet health business and its offerings.

Solutions

We build scientific platforms for the following applications:

- Remote pet health monitoring and telehealth
- Comprehensive veterinary and pet care practice management systems
- Petcare information exchanges with access controls and advanced AI/ML data management functions

Capabilities

- Artificial intelligence and machine learning solutions
- Cloud application development and implementation
- Full lifecycle data security services and operations
- Digital accelerators to deliver quality, compliant solutions in a fast and repeatable way
- Mobile-first experiences and next-generation interfaces

The GlobalLogic Difference

GlobalLogic takes pride in providing solutions that improve both pet owner and clinician outcomes. We help clients across the spectrum of Pet Insurance, PetTech, Pet Products/Services and Pet E-Commerce to design and build innovative products, platforms, and digital experiences.

Here are a few reasons why smart device, pet technology, and diagnostics clients choose GlobalLogic:

- Our **deep working knowledge** of ISO governing standards enables us to work with many different companies' QMS and SDLC.
- Our **experience** in using a variety of tools, software languages, cloud environments, and infrastructure to seamlessly integrate and collaborate with your in-house engineering team.
- Our **expertise** in the design, building, implementation, and testing of systems and Class I, II, and III products in accordance with ISO 13485 certified QMS/IEC 62304 compliant SDLC.
